RE: Campaign Support Engineer position

Dear Ms. Lewis:

I am an enthusiastic web developer who recently completed the 12-week Web Development Immersive at General Assembly. I have a background in advocacy for reproductive rights and would be delighted to join MoveOn.org as a Campaign Support Engineer from now until November 30.

Since completing the Web Development Immersive I have been active with Code for DC, a civic hacking organization, contributing to a new case management website for the DC Abortion Fund. Prior to enrolling at General Assembly I was the lead fundraiser for the National Family Planning & Reproductive Health Association, a national advocacy organization supporting public funding for contraception.

The Web Development Immersive taught me fluency in full-stack web development, from essential building blocks (HTML5, CSS3, JavaScript & jQuery) to popular frameworks including Ruby on Rails, AngularJS, and Node.js. Regarding database management, I have created several websites using PostgreSQL and am skilled at working with raw SQL as well as the ActiveRecord ORM. I am ready to hit the ground running and help advance MoveOn.org's essential mission.

Thank you for reviewing my application. I look forward to hearing from you.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jeffrey Eaton', with a stylized, cursive script.
